## MARKET OUTLOOK

Malaysia's real GDP growth is expected to expand by +5.1% in 2017 (2016:+4.2%) underpinned by sustained consumer spending, stronger growth in public and private investments, a rebound in Government consumption expenditure and a firmer export growth. Growth in public and private investments will be driven by the rollout of existing and new major infrastructure and investment projects. The Overnight Policy Rate is also expected to remain unchanged at 3.00% in 2017 aimed at supporting domestic demand. The Bank's financing growth is expected to be slightly ahead of GDP growth in 2017, by focusing on pockets of opportunities within the consumer segment, retail SME and corporate financing.
