Notes:

- The fund profit rate represents the net profit rate to the IAH and is computed based on the following formula:
 Profit rate = (Total Income - Impairment Allowances) * PSR
- 2. Past performance is not reflective of future performance

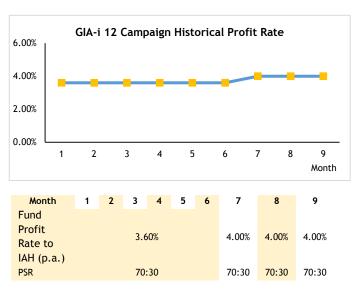

FUND PERFORMANCE

With effect from 16th June 2017, PSR and Indicative Profit Rate of Term Fund-i was revised with Tenure based as per table above. The reason for the revision of the PSR and Indicative profit rate is to create a more rewarding experience for IAH i.e. better profit rates for longer tenure and higher balances. This is also to be competitively aligned with other Financial Institutions and better manage the fund with current challenging market outlook.

MARKET OUTLOOK

Malaysia's real GDP growth is expected to expand by +5.1% in 2017 (2016:+4.2%) underpinned by sustained consumer spending, stronger growth in public and private investments, a rebound in Government consumption expenditure and a firmer export growth. Growth in public and private investments will be driven by the rollout of existing and new major infrastructure and investment projects. The Overnight Policy Rate is also expected to remain unchanged at 3.00% in 2017 aimed at supporting domestic demand. The Bank's financing growth is expected to be slightly ahead of GDP growth in 2017, by focusing on pockets of opportunities within the consumer segment, retail SME and corporate financing.
