9 POINT LED SANITIZATION

3 UVC-LED + 6 UVA-LED

UVC-LED THE BETTER SAFER CHOICE

- ✓ The **fastest** sanitization technology in the market
- ✓ Eliminates up to **99.9%** of surface bacteria and germs
- ✓ Deep thorough elimination of germs, **hidden or exposed**
- ✓ **Non toxic sanitization**, odourless and mercury free
- ✓ **Non damaging** to device during sanitization
- ✓ **Clinically Proven Sanitization against numerous bacteria** like Staphylococcus Aureus and Escherichia Coli etc

UVC LED VS LAMP [Know The Differences]

Sanitization method	Mercury UV Lamp ★★	UVC LED ★★★★★
Time	15 - 120 minutes (Long)	1-5 minutes (The Fastest)
Wavelength	185nm	260nm to 280nm
Effect	Thorough	Sanitization rate of 99.9%
Mercury (Toxic)	Yes	None
Odour (Ozone)	Yes, need to wait 20 minutes to safely use device again	None
Washable Base	No	Yes

TRUE360™ SANITIZATION AIRFLOW

Devices are slightly elevated above the base by MaxiLift which allow UVC rays to reach every surface for a complete thorough sanitization

MaxiLift elevates devices above base

UVC Rays are diverted toward device by reflective glossy coating at the base

1MIN
MAX SPEED

Super speed sanitization for 1 to 2 items

2

Your Needs

5MIN
DEEP CLEAN

Thorough intense sanitization for multiple and bigger items

SPACIOUS CAPACITY

With an internal height of 4cm, STERA360 is much deeper than most competing brands. It is designed to fit most of today's mobile gadgets or your everyday handheld accessories, sanitizing them at one go.

ALL-PURPOSE STERILIZER BOX

ALL-PURPOSE STERILIZER BOX

AUTO SAFETY SHUT DOWN

STERA360 will automatically shut down the UVC sanitization if the lid is accidentally opened which prevents the rays from harming your skin or eyes
