## PRODUCT HIGHLIGHTS SHEET

### AHAM WORLD SERIES - JAPAN GROWTH FUND

#### BRIEF INFORMATION ON THE PRODUCT

##### 1. What is this product about?

The AHAM World Series - Japan Growth Fund is an open-ended equity fund.

The Fund seeks to provide investors with capital appreciation over the medium to long term period by focusing on investment in undervalued Japanese companies with growth potential.

#### PRODUCT SUITABILITY

##### 2. Who is this product suitable for?

The Fund is designed for retail investors who have a medium to long term investment horizon and are able to tolerate high risk.

The Fund offers the investors 2 different Classes of Units, known respectively as the MYR Class and MYR- Hedged Class.

#### KEY PRODUCT

##### 3. What am I investing in?

	MYR-Hedged Class	MYR Class
<b>Launch date</b>	3 March 2014	2 July 2018
<b>Tenure</b>	This Fund is an open-ended fund where it does not have a fixed maturity date and may only be terminated in accordance with the terms of the Prospectus and the provisions of the Deed.	
<b>Base currency</b>	MYR	
<b>Investment strategy</b>	<p>The Fund will focus on achieving its objective by investing in a portfolio consisting a minimum of 70% of its NAV in equities, while the remaining balance may be invested into liquid assets including money market instruments and deposits.</p> <p>The Fund's investment focus will be on Japanese companies that are undervalued, and are able to display growth potential. The Fund will utilise fundamental research to identify stocks that are undervalued due to mispricing, or going through changes in their business strategy. In the long term, we believe these undervalued companies hold the potential to rise to the price levels that reflect their fundamentals. Key factors which are useful to the identification of such companies would include sales and profit growth, financial strength and gearing levels, expected future earnings growth, share price valuation as well as management quality.</p> <p><i>The reference of "Japanese companies" in the above paragraph means companies which are domiciled in Japan or companies which derive its earnings from Japan.</i></p> <p>To achieve its objective, the Fund will also have the flexibility to invest in collective investment schemes that have similar investment objectives to the Fund, as well as equity-linked instruments such as warrants. We expect to have a small portion of collective investment schemes and warrants investments relative to the size of the Fund.</p> <p><b>Derivative</b></p> <p>Derivative trades may be carried out for hedging purposes, through financial instruments including, but not limited to, forward contracts, futures contracts and swaps. Futures and forward contracts are generally contracts between two parties to trade an asset at an agreed price on a pre-determined future date. Swaps, whereas, is an agreement to swap or exchange two financial instruments between two parties.</p>	

	MYR-Hedged Class	MYR Class						
	<p>The intention of hedging is to preserve the value of the asset from any adverse price movements. For example, to hedge against foreign currency exchange risk, the Fund may enter into a currency forward contract to offset any adverse foreign currency movements by determining an agreed rate for an agreed tenure with its counterparty. While the hedging transactions will assist with mitigating the potential foreign exchange losses by the Fund, any potential foreign exchange gains from the hedging strategy will be capped as well.</p> <p>The Fund adopts commitment approach to measure the Fund's global exposure to derivatives. The commitment approach is a methodology that aggregates the underlying market values or notional values of derivatives after taking into account the possible effects of netting and/or hedging arrangements. The Fund's global exposure from the derivatives position must not exceed 100% of NAV of the Fund at all times.</p> <p><b>Temporary Defensive Positions</b></p> <p>We hold the option to take temporary defensive measures that may be inconsistent with the Fund's principal strategy, and asset allocation to protect the Fund against adverse market conditions. To manage the risk of the Fund, we may shift the Fund's focus into lower risk investments such as deposits with Financial Institutions or money market instruments.</p>

#### 4. Who am I investing with?

Relevant parties' information:

<b>The Manager</b>	AHAM Asset Management Berhad
<b>The External Manager</b>	Nikko Asset Management Co., Ltd.
<b>The Trustee</b>	Deutsche Trustees Malaysia Berhad

#### 5. What are the possible outcomes of my investment?

This is an equity fund that focuses on investment in Japanese equities. The performance of the Fund would be dependent on the Japan equity markets that are investable by the Fund. The Fund's performance is reliant on the External Fund Manager's expertise in managing the Fund to meet its objective.

The Fund's investment into equities would to a great extent, be linked to the price movements of the equity markets. If the equities that are investable by the Fund performs well, the Fund's performance may reflect the same. However, should the equities that are investable by the Fund perform poorly, the Fund's performance may also be impacted negatively.

The Fund is not expected to make distribution. However, incidental distribution may be declared whenever appropriate.

\* At our discretion, we may reduce the transaction value and Units, including for transactions made via digital channels, subject to terms and conditions disclosed in the respective channels.

## KEY RISKS

## 6. What are the key risks associated with this product?

**General risks**

- **Manager's risk** – This risk refers to the day-to-day management of the Fund by the Manager which will impact the performance of the Fund. For example, investment decisions undertaken by the Manager as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
- **Inflation risk** – This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
- **Loan / financing risk** – This risk occurs when you take a loan/financing to finance your investment. The inherent risk of investing with borrowed/financed money includes you being unable to service the loan/financing repayments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower Net Asset Value per Unit as compared to the Net Asset Value per Unit at the point of purchase towards settling the loan/financing.
- **Operational risk** – This risk refers to the possibility of a breakdown in the Manager's internal controls and policies. The breakdown may be a result of human error, system failure or fraud where employees of the Manager collude with one another. This risk may cause monetary loss and/or inconvenience to you. The Manager will regularly review its internal policies and system capability to mitigate this risk. Additionally, the Manager maintains a strict segregation of duties to mitigate instances of fraudulent practices amongst employees of the Manager.
- **Liquidity risk** – Liquidity risk refers to two scenarios. The first is where an investment cannot be sold due to unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund.
- **Suspension of repurchase request risk** – Having considered the best interests of Unit Holders, the repurchase requests by the Unit Holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the Fund's assets cannot be determined. In such case, Unit Holders will not be able to redeem their Units and will be compelled to remain invested in the Fund for a longer period of time. Hence, their investments will continue to be subject to the risks inherent to the Fund.

**Specific risks**

- **Stock specific risk** – Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV.
- **Warrants investment risk** – The value of the warrants will depend on the pricing of the underlying security whereby the growth and performance prospect of the underlying security would consequentially affect the value of the warrants. In addition, the value of the warrants may decrease exponentially as the warrants approach its maturity date and the potential gains from a favourable price movement of the underlying may be offset by aggressive time decay. We may consider unwinding these warrants if there are material adverse changes to its value with the aim to mitigate the risk.
- **Currency risk** – As the investments of the Fund may be denominated in currencies other than the Base Currency, any fluctuation in the exchange rate between the Base Currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

Currency risk at the Hedged Class level

Currency hedging reduces the effect of exchange rate movements for the Hedged Class, but it does not entirely eliminate currency risk between the Hedged Class and the currency of the underlying investments (not a perfect hedge). Hence, the unhedged portion of the respective Hedged Class will be affected by the exchange rate movements and it may cause fluctuation of NAV of the respective Hedged Class. You should note however, that if the exchange rate moves favourably, the Fund would not benefit from any upside in currency movement due to the hedging strategy. In addition, hedging is subject to a minimum investment size of entering into a forward contract and cost of hedging which may affect returns of the respective Hedged Class.

- **Single country risk** – The investment of the Fund in securities issued by companies which are domiciled in Japan or companies which derive its earnings from Japan may be affected by risks specific to Japan. Such risks, which include changes in economic fundamentals, social and political stability and sovereign policies, may have an impact on the prices of the Fund's investment in Japan. Consequently, it may also affect the Fund's NAV.

- **Regulatory risk** – The investments of the Fund are exposed to changes in the laws and regulations in the countries that the Fund invest in. These regulatory changes pose a risk to the Fund as it may materially impact the investments of the Fund. To manage and mitigate such risk, the Manager seeks to continuously keep abreast of regulatory developments (for example, by closely monitoring announcements on regulators’ website and mainstream medias) in the country that the Fund invests in. The Manager may dispose its investments in that particular country should the regulatory changes adversely impact the Unit Holders’ interest or diminish returns to the Fund.
- **Collective investment scheme risk** – As the Fund is allowed to invest in collective investment schemes, any adverse effect on the respective collective investment schemes will impact the NAV of the Fund. For example, the respective collective investment schemes may under-perform its benchmarks due to poor market conditions and as a result, the NAV of the Fund will be adversely affected as the performance of the Fund is dependent on the performance of the respective collective investment schemes. In addition, any mismanagement of the collective investment schemes or poor decisions taken on the collective investment schemes may adversely affect the NAV of the collective investment schemes and hence the Fund.

**Note: Please refer to the Fund’s Prospectus on further details on the general and specific risks.**

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Prospectus to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.
