6. Key Risks

Specific Risks of the Fund

Equity specific risk

Prices of a particular equity may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such equity will adversely affect the Fund's NAV. However, this impact is mitigated through careful selection of equities through analysis of its fundamental background, portfolio diversification across a number of sectors and industries, as well as site visits.

Credit and default risk

Credit risk relates to the creditworthiness of the issuers of the fixed income securities and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the fixed income securities. In the case of rated fixed income securities, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a fixed income security either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the fixed income securities. This could adversely affect the value of the Fund.

Interest rate risk

Interest rate risk refers to the impact of interest rate changes on the valuation of fixed income securities. When interest rates rise, fixed income securities' prices generally decline and this may lower the market value of the Fund's investment in fixed income securities. The reverse may apply when interest rates fall.

Investors are reminded that the risks listed above may not be exhaustive and if necessary, they should consult their adviser(s), e.g. bankers, lawyers, stockbrokers or independent professional advisers for a better understanding of the risks.

For more details, please refer to section 3.8 in the master prospectus (conventional funds) for the general and specific risks of investing in the Fund.

Note: If your investments are made through an institutional unit trust scheme adviser ("Distributor") which adopts the nominee system of ownership, you would not be deemed to be a unit holder under the deed and as a result, your rights as an investor may be limited. Accordingly, the Manager will only recognize the Distributor as a unit holder of the Fund and the Distributor shall be entitled to all the rights conferred to it under the deed.
