PRODUCT SUITABILITY

This Fund is suitable for investors who:

- (i) seek to achieve long term* capital appreciation; and
- (ii) wish to invest in a diversified portfolio of China Shariah-compliant equities.

*Note: * "long term" in this context refers to a period of between 5 - 7 years.*

KEY PRODUCT FEATURES

INVESTMENT OBJECTIVE

The Fund aims to achieve long term* capital appreciation through investments in China Shariah-compliant equities.

*Note: * "long term" in this context refers to a period of between 5 - 7 years.*

INVESTMENT STRATEGY

The Fund seeks to achieve its investment objective through a diversified portfolio of China Shariah-compliant equities which include but not limited to, China A-shares, China H-shares, Islamic real estate investment trusts ("REITs"), Islamic exchange traded funds ("ETFs") and China Shariah-compliant equity-related securities (collectively "China Shariah-compliant Equities"). The Fund will also invest in Islamic liquid assets including Islamic money market instruments, Islamic deposits with Islamic financial institutions and Islamic collective investment schemes investing in Islamic money market instruments and/or Islamic deposits with Islamic financial institutions.

The Fund will focus on companies that are able to create true shareholder value^{^^}, have a strong and stable earnings stream^{^^} and have a strong sustainable dividend yield^{^^} that issue China Shariah-compliant Equities with sustainable dividend payments^{^^}.

The Fund's direct investments in China Shariah-compliant Equities are those of companies whose securities are listed on the Hong Kong SAR, Shanghai, Shenzhen and Taiwan Stock Exchanges, including China companies that are listed in other non China markets such as the United States of America, United Kingdom and Singapore Stock Exchanges. These are companies with revenues derived from China and/or have business operations located in the China. The Fund's investments will also include Islamic collective investment schemes (including Islamic REITs and Islamic ETFs) domiciled in Singapore, Luxembourg, Hong Kong SAR, the United Kingdom and the United States of America investing primarily in the China markets. The Fund's direct investments are not sector specific and can invest in a broad range of sectors and industries. It seeks to add value by investing in a selective range of opportunities identified by the Manager as having a strong attraction based on company fundamentals.

Thus, the Fund's portfolio will be structured as follows:

Minimum 70% of Net Asset Value ("NAV") - Investment in China Shariah-compliant Equities.

The balance of the Fund's NAV may be invested in Islamic liquid assets comprising Islamic money market instruments, Islamic deposits with Islamic financial institutions and Islamic collective investment schemes investing in Islamic money market instruments and/or Islamic deposits with Islamic financial institutions.

Provided always the above asset allocation is maintained, the range of the Fund's asset allocation will be reviewed from time to time depending on the judgement of the Manager as to the general market and economic conditions. Although the Fund is actively managed, how active or the frequency of its trading strategy will very much depend on market opportunities.

The risk management strategies and techniques employed by the Manager include diversification of the Fund's investments in terms of its exposure to various industries, sectors, countries and asset classes and/or type of investments (i.e. Shariah-compliant equities and Islamic money market instruments). The Manager may participate in Islamic financial derivatives for currency hedging purposes where appropriate. Generally, the assets of the Fund will be invested over a medium to long term period with disposal of the investments when necessary to control risk as well as to optimise

KEY PRODUCT FEATURES

capital gains. This is especially so when the full growth potential of an investment is deemed to have been reduced following a prolonged rise in equity values and the other available alternative investment may present cheaper valuations and potential higher returns. The Fund also complies with the permitted investments and restrictions imposed by the Securities Commission Malaysia. Adherence to the permitted investments and restrictions also helps the Manager to risk-manage the Fund's portfolio in terms of diversification. Moreover, the Manager in making its investment decisions shall at all times comply with the investment restrictions of the Fund and requirements as set out in the deed of the Fund.

For investments in foreign markets, the Manager in managing the principal risks such as country risk and currency risk will always take into consideration the reference benchmark as well as its evaluation of the historical developments and its prior experience in such markets. Such practice will be managed through active management and constant review of the economic and political developments of the countries invested. Investments will ultimately be made based on risk-reward profiles.

The Manager may take temporary defensive positions that may be inconsistent with the Fund's principal strategy in attempting to respond to adverse economic, political or any other market conditions. In such circumstances, the Manager may reallocate up to 100% of the Fund's Shariah-compliant equity investments into other asset classes such as sukuk, Islamic money market instruments, Islamic deposits with Islamic financial institutions, which are defensive in nature and comply with Shariah requirements.

^^ Explanatory note on these terms:

"sustainable dividend payments" means consistent % dividend payout by a company over time, for example the Manager would prefer a company that has a stable dividend payout ratio rather than a company that has high payout ratio in one or two years and zero payout ratio in the next few years.

"create true shareholder value" are companies that are in the judgement of the Manager, deliver value through their management's ability to grow earnings, dividends and share price. In other words, it is the sum of all strategic decisions that affect the company's ability to efficiently increase the amount of free cash flow over time, after considering factors such as the effect of inflation, amongst others.

"strong and stable earnings stream" are companies that in the judgement of the Manager, can offer consistently growing/increasing corporate earnings with low volatility from one year to the next.

"strong sustainable dividend yield" are companies that in the judgement of the Manager, can offer increasing dividend payout from one year to the next.

DISTRIBUTION

DISTRIBUTION POLICY - Distribution is incidental, subject to the availability of income at the end of the financial year.

DISTRIBUTION MODE - Distribution, if any, after deduction of taxation and expenses (i.e. net distributions), will be reinvested to purchase additional units of the Fund based on the NAV per unit as at the first Business Day after units of the Fund are quoted ex-entitlement. Allotment of such units of the Fund shall be within two (2) weeks thereafter. No sales charge will be imposed for any reinvestment of distribution into the Fund.

KEY RISKS

COUNTRY RISK - The Fund will be investing in foreign markets. The foreign investments portion of the Fund may be affected by risks specific to the country that the Fund invests in. Such risks include changes in the country's economic fundamentals, social and political stability, currency movements and foreign investments policies. These factors may impact the prices of the securities that the Fund invests in and ultimately lower the NAV.

CURRENCY RISK - This risk is associated with investments that are quoted in foreign currency denomination. When a security is denominated in a foreign currency which fluctuates unfavourably against Ringgit Malaysia ("RM"), the Fund may face currency loss. This may lead to a lower NAV expressed in RM. In addition, an investor investing into a class denominated in currencies other than in RM may also be subject to further currency risk as fluctuation to the exchange rate of the respective currency of that class against RM may impact the value of the NAV per unit expressed in the currency of the relevant class. The Fund may participate in Islamic currency hedging instruments to mitigate the currency risk, if necessary.

MARKET RISK - The economic and political conditions in developing and emerging markets differ from those in developed markets and offer less social, political and economic stability as compared to developed markets. Other risks in developing and emerging markets that can adversely impact the Fund may include: investment and repatriation restrictions, the potential for unusual volatility in developing and emerging markets is higher as compared to more industrialised nations, limited information to the investors and less stringent disclosure requirements, shallow and substantially smaller liquid securities markets than in more industrialised nations resulting in illiquid securities markets, certain local tax law considerations that may negatively impact the Fund's investment, limited regulation of the securities markets and the possibility of limited legal recourse for the Fund and the custodial and/or the settlement systems may not be fully developed. These risks are likely to exist to a greater or lesser degree in some of the markets that the Fund may invest in. Investing in emerging markets such as the People's Republic of China subjects the Fund to a higher level of market risk than investments in a developed country. This is due to, among other things, greater market volatility, lower trading volume, political and economic instability, settlement risk, greater risk of market shut down and more governmental limitations on foreign investment than those typically found in developed markets. The regulatory and legal framework for capital markets in China may not be as well developed when compared with those of developed countries.

PARTICULAR SECURITY RISK - The fluctuation in the performance of each individual security that the Fund invests in will affect the price of the units. Not all companies issuing these securities are successful. The success and failure of the companies will cause its securities value to rise or fall. Valued collectively, the performance of individual securities will cause the Fund's unit price to rise or fall accordingly.

RECLASSIFICATION OF SHARIAH STATUS RISK - This risk refers to the risk that the currently held Shariah-compliant equities in the Fund may be reclassified as Shariah non-compliant in the periodic review of the equities by the Shariah Advisory Council of the Securities Commission Malaysia, the Shariah Adviser or the Shariah boards of the relevant Islamic indices. If this occurs, the Manager will take the necessary steps to dispose of such equities in accordance with the Fund's Shariah investment guidelines.

LIQUIDITY RISK - This refers to the ease with which an asset can be sold at or near its fair value depending on the volume traded on the market. Should an asset become illiquid, it may be sold at a discount to its fair value, thus lowering the value of the Fund's investments and subsequently the value of Unit Holders' investments and may affect the ability of the Fund to honour requests for redemption in a timely manner. To mitigate the liquidity risk, the Fund maintains a reasonable level of Islamic liquid asset to meet any redemption request.

Note: If your investments are made through an institutional unit trust scheme adviser ("IUTA") which adopts the nominee system of ownership, you would not be deemed to be a unit holder of the Fund ("Unit Holder") under the deed of the Fund and as a result, you may not exercise all the rights ordinarily conferred to a Unit Holder (e.g. the right to call for Unit Holders' meetings and the right to vote at a Unit Holders' meeting). Accordingly, the Manager will only recognise the IUTA as a Unit Holder and the IUTA shall be entitled to all the rights conferred to it under the deed of the Fund.

Accordingly, the price of the Fund for a particular Business Day will not be published online on the Manager's website on the next day but will instead be published the next following day (i.e. price will be two (2) days old).
