#### **KEY PRODUCT FEATURES**

#### What am I investing in?

| Fund Category            | Equity (Feeder Fund)   |  |  |  |  |
|--------------------------|--|--|--|--|--|
| Fund Type                | Growth   |  |  |  |  |
| Investment Objective     | The Fund seeks to provide Unit Holders with Long Term capital appreciation by investing in the Target Fund which has an investment focus in Japan.   |  |  |  |  |
| Investment Strategy      | The Fund seeks to achieve its investment objective by investing in a minimum of 90% of the Fund's NAV in the Target Fund with the remaining balance in liquid assets. Accordingly, this Fund will have a passive strategy as all the investment decisions will be made at the Target Fund level.   |  |  |  |  |
|                          | When deemed necessary, we may use derivatives such as options, futures contracts, forwards contracts or swaps for the purpose of hedging. In the event of a downgrade in the rating of a counterparty of an OTC derivative, we reserve the right to deal with the OTC derivative in the best interest of the Unit Holders. We will ensure that the Fund's global exposure from financial derivatives position does not exceed the Fund's NAV at all times. |  |  |  |  |
|                          | We may adopt a temporary defensive strategy that may be inconsistent with the Fund's investment strategy and asset allocation in response to adverse economic, political or any market condition. Under such circumstances, the Fund may hold up to 100% of its NAV in liquid assets.  |  |  |  |  |
|                          | If in our opinion, the Target Fund no longer meets the Fund's objective, we may, in consultation with the Trustee, liquidate the investments in the Target Fund and hold 100% of the Fund's NAV in liquid assets or replace the Target Fund with another fund with similar objective.  |  |  |  |  |

#### **KEY RISKS ASSOCIATED WITH THE FUND**

Please be advised that if an investor invests in units through an institutional unit trust adviser which adopts the nominee system of ownership, the investor would not be considered to be a unit holder under the Fund's Deed as the investor's name will not appear in the register of unit holders. The investor may consequently not have all the rights ordinarily exercisable by a unit holder (for example, the right to call for a unit holders' meeting and to vote thereat).

| Risk of Passive<br>Strategy                                | The Fund adopts a passive strategy of investing a minimum of 90% of its NAV into<br>the Target Fund at all times. All investment decisions on the Target Fund are lef<br>with the Target Fund's fund manager.  |  |  |  |
|--|--|--|--|--|
| Currency Risk  | This risk is associated with investments denominated in currencies different from the Base Currency. Any fluctuations in the exchange rates between the Base Currency and the currencies in which the investments are denominated may affect the NAV of the Fund, and consequently the NAV per unit of the Fund.   |  |  |  |
| Risk of Compulsory<br>Realisation of the<br>Target Fund    | As the Fund will be investing a minimum of 90% of its NAV in the Target Fund, any event of compulsory realisation occurred on the Target Fund will have an impact to the Fund.   |  |  |  |
| Risk of Limitation on<br>Realisation of the<br>Target Fund | As the Fund will be investing a minimum of 90% of its NAV in the Target Fund, the realisation proceeds of the Fund are subject to the provisions of the deed of the Target Fund. The Management Company may limit the total number of units to be realised by the holders or cancelled by the Management Company on any dealing day to 10% of the total number of units of the Target Fund or any class of the Target Fund then in issue. As a result, the Fund's redemption proceeds from the Target Fund may be delayed. Under such circumstance, we will apply such limitation proportionately to all Unit Holders who have validly requested realisations on such dealing day. In this case, redemption requests from Unit Holders may be processed over more than one Business Day. |  |  |  |

#### **KEY RISKS ASSOCIATED WITH THE TARGET FUND**

| Market Risk                             | Prices of securities may go up or down in response to changes in economic conditions, interest rates and the market's perception of securities, which in turn may cause the value of units to rise or fall.  |  |  |  |
|---|--|--|--|--|
| Equity Risk                             | The Target Fund invests in equities and equity-related securities which are subject<br>to market risks that historically have resulted in greater price volatility than that<br>experienced by bonds and other fixed income securities.  |  |  |  |
| Foreign Exchange and<br>Currency Risk   | The Target Fund which is denominated in JPY may have exposure, either directly or indirectly, to a wide range of currencies ay affect the value of the units.  |  |  |  |
| Political, Regulatory<br>and Legal Risk | The value and price of the Target Fund's investments may be adversely affected by international political developments, changes in exchange controls, taxation policies, monetary and fiscal policies, and etc.  |  |  |  |
| Derivatives Risk                        | As the Target Fund may use or invest in financial derivative instruments ("FDIs" or "derivatives"), it will be subject to risks associated with the FDIs. These FDIs include foreign exchange forward contracts and equity index future contracts. Investments in FDIs may require the deposit of an initial margin and additional deposit of margin |  |  |  |

|   | on short notice if the market moves against the investment positions. If the required margin is not provided in time, the Target Fund's investments may be liquidated at a loss.   |  |  |  |  |
|---|--|--|--|--|--|
| Single Country Risk   | The Target Fund's investments will be focused mainly in Japan. Investors should be<br>aware that while such concentrated exposure may present greater opportunities and<br>potential for capital appreciation, the Target Fund may be subject to higher risks as<br>there may be less diversification than a regional or global portfolio.   |  |  |  |  |
| Small and Medium<br>Capitalisation<br>Companies Risk        | Investments in small and medium capitalisation companies generally carry greater<br>risk than is customarily associated with larger capitalisation companies, which may<br>include, less public information, greater volatility, higher risk of failure than larger<br>companies and less liquidity.   |  |  |  |  |
| Counterparty Risk   | Where the Target Fund enters into over-the-counter transactions, the Target Fund is exposed to the risk that a counterparty may default on its obligations to perform under the relevant contract.   |  |  |  |  |
| Exceptional Market<br>Conditions Risk                       | Inder certain market conditions, it may be difficult or impossible to liquidate or ebalance positions.   |  |  |  |  |
| Actions of Institutional<br>Investors                       | The Target Fund may accept subscriptions from institutional investors. The institutional investors will not have any control over the investment decisions for t Target Fund, the actions of such investors may have a material effect on the Targ Fund.   |  |  |  |  |
| Liquidity Risk of<br>Investments                            | The Target Fund will be exposed to liquidity risk when the Target Fund is invested<br>in Asian and/or emerging markets, where the Target Fund may face difficulty in<br>unwinding its position in these markets which results in insufficient cash to meet<br>redemption requirements.   |  |  |  |  |
| Broker Risk   | In the event that one of the brokers or dealers were to fail or become insolvent, there is a risk that the Target Fund's orders may not be transmitted or executed and its outstanding trades made through the broker or dealer may not settle.  |  |  |  |  |
| Investment<br>Management Risk                               | Investment performance depends on the portfolio management team of the Management Company and the team's investment strategies. If the investmen strategies do not perform as expected, if opportunities to implement those strategies do not arise, or if the team does not implement its investment strategies successfully an investment portfolio may underperform or suffer significant losses. |  |  |  |  |
| Risk of Using Rating<br>Agencies and other<br>Third Parties | Credit ratings of instruments invested into by the Target Fund represent the Management Company's and/or rating agencies' opinion regarding the credit quality of the instrument or the institution and are not a guarantee of quality. The Management Company will not be responsible for any failures by such parties in their valuations.   |  |  |  |  |

Note: The abovementioned risks which investors should consider before investing into the Fund should not be considered to be an exhaustive list. Investors should be aware that investments in the Fund may be exposed to other unforeseeable risks from time to time. Investors are advised to consult their professional adviser before investing. Please refer to the Prospectus under "Risk Factors" for further details on risks.

 ^ The Fund was launched on 12 October 2015 as a wholesale fund. Figures quoted are from launch date to 30 April 2016.

Note: There were no returns for MYR Class as there was no unit in circulation since the launch of the class.

#### Performance Review

#### MYR hedged Class

For the financial year ended 30 April 2024, the Class registered a return of 18.64%, underperforming the benchmark return of 25.01%.

#### Basis of calculation and assumptions made in calculating the returns

- Average total return of the Fund for a period is computed based on the compounded annual return.
- The calculation of the annual total return is computed on NAV per unit to NAV per unit basis and has been adjusted to reflect distributions and unit splits, if any.

#### Portfolio Turnover Ratio ("PTR")

|             | 2024 | 2023 | 2022 |
|-------------|------|------|------|
| PTR (times) | 0.75 | 0.10 | 0.35 |

As at 30 April 2024, portfolio turnover ratio of 0.75 times is lower against 0.10 times in the previous financial year mainly due to decrease in average fund size.
